### ABOUT ME

Web Development student at Passerelles Numériques Cambodia with experience building backend applications using Laravel, PHP, PostgreSQL, and MySQL. Skilled in developing RESTful APIs, database design, and API integration. Passionate about building secure, scalable applications and continuously improving backend development skills.

### EXPERIENCE

#### Project VC1 Rental Services

Date: Dec 22, 2025 – Jan 04, 2026

##### Position: Developer & QA

- Repository:
- [https://github.com/deah2026/Rental\\_Service.git](https://github.com/deah2026/Rental_Service.git)
- <https://chongchoul.online>

##### Project Description:

- Built a full-stack rental platform with search and booking features using Vue.js, Laravel, and MySQL. Developed core functionalities, performed testing, fixed bugs, and ensured system quality through QA processes.

#### Project Inventory Management System

##### Position: Developer (Sprint 1) | Project Manager (Sprint 2)

- [https://github.com/pilip-123/inventory\\_project.git](https://github.com/pilip-123/inventory_project.git)
- <https://inventoryproject-ebon.vercel.app>

##### Project Description:

- Developed an inventory system to manage products and stock with full CRUD features using JavaScript, HTML, CSS, and Local Storage.

##### Sprint 1 – Developer:

- Built core features (add, edit, delete, view items) and created a simple, responsive UI.

##### Sprint 2 – Project Manager:

- Planned sprint tasks, coordinated team work, tracked progress, and ensured code quality and timely delivery.
- Deployment: Vercel
- Tech Stack: JavaScript, HTML, CSS, Local Storage
